## MOTIF

### Weaving industry at Sualkuchi

Sualkuchi is a village in Kamrup district located on the north bank of the mighty river Brahmaputra. In the context of silk weaving, Sualkuchi is a name that stands apart. Sualkuchi is a weaving village that produces the best silk in the state. The Muga silk and Pat silk along with Eri silk from this region is famous for its quality not only in the state but also in most of the parts of India. The weaving tradition here can be traced to the 11<sup>th</sup> Century when king Dharma Pal dynasty sponsored the craft and bought 26 weaving families from Tantikuchi to Sualkuchi. The village took shape as a weaving village when the Shams occupied Sualkuchi defeating the Mughals in the mid of 17<sup>th</sup> Century. There are about 17,000 silk looms presently working in Sualkuchi. Most of the Sualkuchi's silk is woven into mekhela-chadar and gamosas which have high demand throughout the country and abroad. Sualkuchi is known as the Manchester of the East.

## FOREWORD

The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and non Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village, Town and Ward of the District. The Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1<sup>st</sup> phase of the Census i.e. House Listing and Housing Census. The non Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking, and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15<sup>th</sup> July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly added amenities are: Pre-Primary School, Engineering College, Medical College, Management

Institute, Polytechnic, Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio- gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/ Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System(PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i) Status and Growth History of Towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Shri Prateek Hajela, IAS, Director of Census Operation, Assam. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl.RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB, 2011 Census has been monitored in the Social Studies Division. I am thankful to all of them and others who have contributed to bring out this publication in time.

(C.Chandramouli)  
Registrar General &  
Census Commissioner, India

New Delhi.

Dated:- 16-06-2014

## Preface

The District Census Handbook (DCHB) was first introduced in 1951 Census. This is a publication containing both Census and Non-Census data. The DCHB is a publication where data is sourced both from State Government as well as from the office of the Directorate of Census Operations.

In a DCHB, district wise data at village and town/ Ward level is presented at Community Development Block wise. In DCHBs of earlier Censuses only Primary Census Abstract data was presented alongside the Village directory/Town Directory data. However, during 2011 Census it was decided to bring out two publications of DCHB as Part A and Part B for each district. The Part A will contain various inset tables based on Village Directory/Town Directory data, Part B shall comprise mainly of Census data pertaining to Primary Census Abstract (Rural & Urban) as well as House listing data arranged CD Block wise for each district. This is the first time that the DCHB is coming up with the House listing data in its publication.

The main purpose of DCHB is to disseminate data up to the lowest administrative level of villages in rural areas and wards in urban areas to facilitate micro level planning and development at the grassroots.

The Census Operation in Assam was conducted under the able guidance and supervision of Shri R.K.Das, IAS. I had assumed office as the Director of Census Operations in February, 2014 and by this time collection and compilation of Village and Town Directory schedules for the 26395 villages and 214 towns, including 126 Census Towns had painstakingly been completed. An important aspect of this publication of DCHB is that unlike other Census publications where villages are presented only Revenue Circle wise, this publication of the handbook is presenting villages CD Block wise. For this purpose, the information on CD Blocks was collected from Panchayat and Rural Department of the state Government to arrange the villages accordingly.

The work of collection of Village and Town Directory schedules was done under the supervision of Dr.D.K.Dey, Joint Director and Sri G.R.Saikia, Deputy Director. However, after transfer of Dr. Dey from DCO, Assam, Smt Bharati Chanda supervised the work of compilation, validation and finalization of Village and Town Directory data. Smt Nijora Sharma, Asst. Director guided and co-ordinated the entire staff engaged in the various aspects relating to compilation of the DCHB. Shri J.Ghosh, Sr.Supervisor greatly helped in cross checking and validation of the entire data. Smt. Salma Sahin Laskar, SI-II and Shri Satadal Dutta, DEO also have contributed significantly in bringing out this publication of DCHB by meticulously scrutinizing the data and preparing the manuscripts.

I would like to thank Shri O.M.Singh, Research Officer (Map) and his dedicated team of the Map section for preparing the maps presented in the DCHB.

I am grateful to Dr.C.Chandramouli, IAS Registrar General & Census Commissioner of India for his valuable guidance and his constant encouragement to complete the work within the time frame. I would also like to specially thank Shri A.K.Arora, Joint Director, D.P.Division and his team for their constant technical guidance and co-operation.

Guwahati  
11<sup>th</sup> July, 2014

## **HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK**

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non census data of urban as well as rural areas for each district. The census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and town and ward of the district. The non census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 census DCHB provided a descriptive account of the district, administrative statistics, census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern of 1981 census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a village in addition to prescribed facilities of earlier censuses.

In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented viz.; (i) Status and Growth History of towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities, (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 census as presented in earlier census. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

-----

## Brief history of the district

Kamrup named after Kamarupa, a name by which Assam was previously known in ancient times. The district was originally comprised with parts of present Kamrup (M), Barpeta, Nalbari and Baksa district which got subsequently bifurcated into different independent districts. The district is now a small area in the western part of Assam, with a distinctive native Kamrupi culture and dialect. The distinctive dialect etc. are however, shared with the present administrative districts of Nalbari and Barpeta, these districts being part of an un-divided Kamrup before the 1980s. Assam has been referred to as Kamrup in many of the ancient Indian literature. It was also known as Pragjyotishpur due to the astrology (Jyotish Shashtra) practices that prevailed in this part of the country during that time. However, "Kamrup" became a more predominant name in the later part of the history. Today Kamrup is an administrative district of Assam with its headquarters located at Amingaon. The greater parts of the district consist of wide plains, through the lower portion of which the river Brahmaputra flow a steady course from east to west. The District is bounded by Udalguri and Baska District in the north, Meghalaya state in the south, Darrang District and Kamrup Metropolitan District in the east and Goalpara, Barpeta and Nalbari District in the west.

Kalika Purana and Yogini Tantra, two important Puranas believed to have been written in the tenth century, mention several kings of Assam. One of the most famous kings of Assam was Narakasur who founded the ancient city of "Eastern Astrology". It is stated in Kalika Purana that the place where Brahma first had created all stars and planets is called Pragjyotishpur which was equal to Amravati, the city of Indra. In medieval times or in puranic age Pragjyotish the old name of Assam was changed to Kamrupa. Narak established his capital at Pragjyotishpur, the Guwahati of to-day. He was a very powerful king of that time. The interesting legend that associated with him says that he desired to marry the Goddess Kamakhya. The Goddess gave her consent lying on some conditions that he would have to construct a temple for her, a road and a tank in a single night. The king accepted the challenge and was about to complete his task. The goddess Kamakhya seeing the danger of her made a cock crow before usual hour. Narak killed the cock at a place about 10 kms. from Guwahati and since then that place is known as Kukurakata. Narak's name is also remembered as one of the protectors of Kamakhya and the builder of the causeway up the southern face of the hill Nilachal on which the temple of Kamakhya stands. The name of the place Pragjyotishpur was changed to Kamrupa. There was also a legend. The story goes that the God of love was burnt to ashes by the fiery glance of lord Siva (Mahadev) and Kamdev has regained his life at the supplication of his wife Ratidevi. As a consequence, the place goes by the name Kamrupa. The Chinese pilgrim Hiuen-Tsang in the 7<sup>th</sup> century had mentioned the name of this place as Ka-mo-lu-pa. According to him the area of the kingdom Kamrupa was 8375 li (1675 miles or 2650 kms.) and the amplitude for Kamrupa was 30 li (5 miles or 8 kms.).

It required two months time for a traveler to make a jaunt from the capital to the end of the verge of the kingdom. Till the end of the rule of Koch king Naranarayana, the name of his kingdom was Kamrup. In the absence of valid and authentic records it is not easy to mention how long

Pragjyotishpur or modern Guwahati has gone on to be the capital of the kingdom.

Probably, after the death of Bhaskar Varman, the capital of Kamrup was transferred to Harappeswar or Hatappeswar by Salastambha which is identified as modern Tezpur. Brahmapal had transferred the capital at the end of the tenth century again to the Pragjyotishpur or its nearby place. Ratnapal son of Brahmapal, after fortifying this city for favour of his dynasty has named the capital of his kingdom 'Shri Durjaya'. Late K.L. Baruah in his book – "Early history of Kamrup" has pointed out to be this place in and around old Pragjyotishpur. At the end of the eleventh century, the capital of king Indrapal was Kamrupnagar at Kamata. Some are of the view that it might be either at Guwahati or near to North Guwahati. It is beyond doubt that the same place was called Pragjyotishpur in ancient time and Kamrup in medieval time and in most of the time, capital was at Guwahati or somewhere thereabout. From the past history or legend it is categorically said that old Pragjyotishpur is the present modern Guwahati city of Kamrup district.

The centuries did not leave much recorded history. Some copper plates of the eleventh century show that Narak was displaced by Salastambha, a Mecha or foreign conqueror whose line ended in the person of Sri Harsha. Sriharsha was succeeded by his son, Ratna pala who in turn was succeeded by his son, Indra pala. Since then, the history of the Pala kings remained in dark. After the end of Palas dynasty, the Koch dynasty started by the king Viswa Singha. He founded a beautiful city in Cooch Behar. He visited Nilachal where he was shown a mound. He offered prayers and he had the mound explored and thereafter the ruins of an old temple were discovered. A new temple was then constructed there. He was succeeded by his son Malla Deva in 1534 A.D. He assumed the name of Nara Narayan. He overpowered the Ahom king, the Kachari Raja and the Raja of Manipur. He turned the kings of Jaintia, Tripura and Sylhet. The Koch kings were later on defeated by the Muslim Subedar of Bengal and Guwahati became the capital of the Muslim Governor. In 1658, the Ahom Raja Joydhwaj Singh took advantage of the disputes amongst the claimants to the throne of Shah Jahan, marched down the valley of Brahmaputra and drove the Muslim and his former allies, the Kochs, alike before him. In 1662, Mirjumla the Subedar of Bengal drove away Ahoms from Kamrup and captured Guwahati. Mohammedan Fouzdar was posted there. After departure of the Muslims, Guwahati was occupied by Gadadhar Singh in 1681 A.D. From this time onward, Kamrup became part of the Ahom territories and was administered by a Viceroy stationed at Guwahati.

The Ahoms were a Shan tribe from the kingdom of Pong in the upper valley of the Irrawaddy who at the beginning of the 13<sup>th</sup> century A.D., crossed the Patkai and settled in Sibsagar and Lakhimpur districts of Assam. At the beginning of the 17<sup>th</sup> century, the Ahom began to intervene in Lower Assam.

Gadadhar Singha was the first king to annex Kamrup to the Ahom territories. He was succeeded by Rudra Singha in 1695 A.D. when he died at Guwahati in 1714 A.D., his son constructed the Rudreswar Temple in the memory of his father. From the middle of the 18<sup>th</sup> century, the Ahom power

began to decline. Lakshmi Singha's reign from 1769-1780 was signalised by the out break of the Moamaria insurrection. He was then succeeded by Gauri Nath Singha in 1780 in whose reign the Moamaria insurrection broke out with increased violence. When Gauri Nath died in 1795, he was succeeded by his son, Kamaleswar Singha in whose reign the Daflas made an in road on the Ahom territories and put them in great disorder. He was succeeded by his brother, Chandra Kanta Singha in 1809. He was deposed in 1816 and Purandar Singha was appointed in his stead. He was reinstated by the Burmese whom he has appealed for help. They soon made it clear that they intend to retain their hold in Assam. Under the Burmese's oppression and tyranny, Chandra Kanta Singha fled to Goalpara and he tried to recover his lost kingdom. In the mean time, however, causes of quarrel arose between the British and the Burmese and in 1824 war were declared by the British Government and a force was sent up the valley of Brahmaputra. The Burmese evacuated Guwahati without striking a blow under the Treaty of Yandaboo, 1826. Assam was finally brought under the East India Company. The next historical event with which Kamrup is connected was the Bhutan War of 1864 which resulted in the occupation of Dewangiri. The subsequent history of the district is uneventful.

## **Administrative set up**

The Deputy Commissioner of the District is the overall in charge of the administration of the entire district. He also acts as the Collector in case of Revenue matters, as a District Magistrate in case of maintenance of Law and Order and General Administration, as a District Election Officer in case of conduct of Election, as a Principal Census Officer while conducting Census, and so on. A number of Officers, like Additional Deputy Commissioners, Sub-divisional Officers, Extra Assistant Commissioners and others assist the Deputy Commissioner in looking after the administration of the district. At lower level each sub-division is headed by one Sub-Divisional Officer whereas under him there will be Revenue Circle Officers for each revenue circle who are responsible for the entire administration of the area under their respective revenue circle.

Kamrup district is situated in the Brahmaputra valley region of Assam. The Kamrup district has undergone jurisdictional changes during the last decade. At present, Kamrup district consists of two sub-divisions. They are namely Guwahati Sub-division and Rangia sub-division. The Kamrup district comprises 12 revenue Circles with 1068 villages. It has 14 Community Development Blocks within the district. The total area in the district is 3105 Sq.Km( Rural: 3031.46 Sq.Km and Urban: 73.54 Sq.Km). The rank of the district in comparison to other districts in term of area in the state of Assam is 11. At Kamrup district, there are 2 Statutory Towns: Rangia (MB) and Palasbari (MB) and 14 Census Towns. After 2001 Census, 323 villages were carved out from the district for the inclusion to the newly created districts Baksa (100 villages) and Kamrup Metro (223 villages).

## **District Highlights 2011 Census**

- In Kamrup district there are 12 Revenue Circles and 14 CD Blocks which comprises 1068 villages including 31 uninhabited villages.
- In the district, Hajo Revenue Circle is the most populous having 262531 persons while Koya is the least populous Revenue Circle having 32350 persons.
- Among the CD Block, Chamaria CD Block has the highest number of population with 204884 whereas the lowest is found in Rani (Part) CD Block with 38986.
- The district comprises sixteen (16) towns: 2 Statutory Towns and 14 Census Town. Rangia (MB) is the most populous with 27889 persons while Sanpara (CT) is the smallest in population with 4534 souls.
- While the highest number (138) inhabited villages is found in Boko CD Block and lowest inhabited villages (35) is found in Sualkuchi CD Block.
- The largest village by population is Tupamari with 10964 persons under Chamaria CD Block and the smallest village is Talimara F.V with 3 person under Bongaon CD Block.

## Important Statistics

| State                                      |       |               |            | District   |         |            |
|--|-------|---------------|------------|------------|---------|------------|
| Number of Villages                         |       | Total         | 26,395     | 1,068      |         |            |
|  |       | Inhabited     | 25,372     | 1,037      |         |            |

## **Section - I**

# **Primary Census Abstract (PCA)**

## **Brief Note on Primary Census Abstract**

### **Introduction:**

The Indian Census has the reputation of being one of the best in the world. The first Census in India was conducted in the year 1872. This was conducted at different points of time in different parts of the country. In 1881 a Census was taken for the entire country simultaneously. Since then, Census has been conducted every ten years, without a break. Thus, the Census of India 2011 was the fifteenth in this unbroken series since 1872, the seventh after independence and the second census of the third millennium and twenty first century. The census has been uninterruptedly continued despite of several adversities like wars, epidemics, natural calamities, political unrest, etc.

The Census of India is conducted under the provisions of the Census Act 1948 and the Census Rules, 1990. In Censuses until 1931, a synchronous de-facto method was adopted wherein the Census was conducted throughout the country on a single night. This being a very costly affair and involved the deployment of very large force at one point of time was given up in 1941. Since then the same methodology has been followed in all the Censuses. It is a gigantic operation and considered to be the single largest, complex, peace time administrative exercise in the world.

The Census Operation in India is carried out in two distinct but inter connected phases - the House listing and Housing Census followed by the Population Enumeration. During the first phase of Census 2011 i.e., House listing and Housing Census, the buildings, census houses and households were identified and systematically listed in the House Listing and Housing Census Schedule during the period April to September, 2010 in different States/Union Territories. Apart from listing of houses, some useful data on the amenities available to the households was also collected for assessing condition of human settlements, housing deficits etc.

Censuses prior to Census 2001 had the system of collecting the information through Individual Slip which was a key schedule for every individual. The information collected through slip was then compiled for a household. Some information was also collected in addition to this for the household. During 2001 Census a comprehensive Household Schedule was adopted replacing the individual slip concept. In 2011 Census also similar household schedule was used for canvassing. The scope of demographic, socio-economic parameters has been widened in every census.

### **2. Population Enumeration - Census 2011:**

The field work of the second phase i.e. Population Enumeration was carried out during February-March, 2011. One of the essential features of Population Enumeration in the second phase was that each person was enumerated and her/his individual particulars were collected at a well-defined point of time.

The Census moment and the reference date for the Census of India 2011 was 00:00 hours of 1st March, 2011. The enumeration was conducted from 9th February to 28<sup>th</sup> February, 2011 along with a revisional round from 1<sup>st</sup> March, 2011 to 5<sup>th</sup> March, 2011 synchronously all over the country except for few specific areas of the Jammu & Kashmir, Himachal Pradesh and Uttarakhand

states that remain snowbound in February. In these locations the population enumeration was done from 11<sup>th</sup> September, 2010 to 30<sup>th</sup> September, 2010 along with a revisional round from 1<sup>st</sup> October, 2010 to 5<sup>th</sup> October, 2010. The reference date for the census in snow bound non-synchronous areas of these states was 00.00 hours of the first day of October, 2010. In addition to the coverage during House listing & Housing Census, the enumeration of the Houseless population was carried out on the night of 28<sup>th</sup> February, 2011, as has been the usual practice. For the purpose of Census, certain areas where the access of the civilian enumerators was not permissible due to security reasons termed as 'Special Charges' such as the Defence and strictly Military/Para-Military areas, including operational areas were also covered. Such areas were not covered during the House listing & Housing Census. In addition to the defence/para-military areas, Special Charges also included certain factory areas, certain colonies, sensitive areas, scientific establishments, etc. These also formed Special Charges as these were not accessible by the usual census enumerator.

### **3. Quality Assurance:**

A Task Force for Quality Assurance (TFQA) functioned under the chairmanship of the RG & CCI. Experienced officers of the different divisions of the organization i.e. Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division comprised the TFQA. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The main objective of constituting the TFQA was to subject the data to stringent validation checks and ensure its quality before release as it was expedient to be satisfied itself about the quality of data before putting the same in public domain.

The Directors and their senior officers were involved at all levels with respect to the quality and the coverage of their states/Uts. The TFQA intensively scrutinized coverage and content parameters including edit and imputation logic. The most important aspect of the data quality was to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, especially for small area population statistics. The content was scrutinized mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception was looked at to understand both the existing and the new emerging trends of population distribution and characteristics. A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2011 Population Enumeration results and finally clear them for use. The population data was cleared only after the full possible satisfaction of the TFQA.

The entire work relating to the data validation and scrutiny was completed by all the States/Union territories under the overall supervision and

monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

#### **4. Primary Census Abstract:**

The Primary Census Abstract which is important publication of 2011 Census gives basic information on Area, Total Number of Households, Total Population, Scheduled Castes, Scheduled Tribes Population, Population in the age group 0-6, Literates, Main Workers and Marginal Workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industry Workers, and (iv) Other Workers and also Non-Workers. The characteristics of the Total Population include Scheduled Castes, Scheduled Tribes, Institutional and Houseless Population and are presented by sex and rural-urban residence.

In 1981 census main workers were presented into four categories. As regards 1991 Census, the nine-fold industrial classification of main workers has been given in the Primary Census Abstract. One of the important features of the Primary Census Abstract of 1991 Census was the presentation of population of the age group 0-6 which is continued in 2001 and 2011 Census. All the children of age 6 years or less have been treated as illiterate even if the child is going to a school and may have picked up reading and writing. This will help the data users in better analysis and understanding of the literacy data as the literacy rate is calculated with 7 years and above population and it is referred as effective literacy rate. In 2001 and 2011 census four categories of main workers have been given in the Primary Census Abstract.

#### **5. Level of Presentation of PCA data in District Census Handbooks:**

The format of Primary Census Abstract (PCA) adopted in the DCHB of 2001 Census has been continued for 2011 Census as the data on four categories of works have been presented similar to 2001 census. The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts in DCHB is as under:

1. District Primary Census Abstract -District/C.D. Block/Town.
2. Primary Census Abstract for Scheduled Castes- District/C.D. Block/Town.
3. Primary Census Abstract for Scheduled Tribes -District/C.D. Block/Town.
4. Village Primary Census Abstract -C.D. Block/Village wise.
5. Urban Primary Census Abstract- Town/Ward level.

-4-

The PCA Data for villages was presented C.D. Block wise for the first time in 1991 Census. This practice is continued in 2001 and 2011 Census. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

## 6. Area Figures:

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the C.D. Block are the total of the village areas coming under each C.D. Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level.
